Recruitment Team

United Nations Economic and Social Commission for Western Asia (ESCWA)

Information and Communication Technology Division

Beirut, Lebanon

Subject: Application for Cybersecurity Internship

Dear ESCWA Recruitment Team,

I am writing to apply for the Cybersecurity Internship within ESCWA's Information and Communication Technology Division. I am a second-year Computer Engineering student at Beirut Arab University (GPA: 3.87/4.0), with coursework concentrated in cryptography and cybersecurity, and I am drawn to ESCWA's mandate of strengthening digital resilience and ICT governance across the Western Asia region. Contributing to that mission from Beirut, in the region I call home, is exactly the kind of internship experience I am looking for.

My coursework has given me a working foundation in the principles this role calls for: cryptographic protocols and data confidentiality, secure system design, and vulnerability-aware programming in C, C++, and Java. Outside the classroom, I have been building on this foundation independently, following network security, ethical hacking and penetration testing, digital forensics, and application security as focused areas of interest, and working comfortably across both Windows and Linux environments. I am also familiar with Git and GitHub for version control, which I understand supports ESCWA's collaborative approach to monitoring and investigating ICT infrastructure.

Alongside my technical coursework, I have developed the communication and organizational skills that a UN internship demands. As a Private English Tutor, I independently managed lesson planning, scheduling, and progress tracking for my students, which sharpened my ability to explain technical material clearly, a skill I expect to draw on when documenting findings or supporting awareness efforts. As an IEEE Committee Member responsible for event planning and public relations, and as a Red Cross volunteer with the BAU club, I have worked within teams under real deadlines and built the coordination skills needed in a fast-moving, multicultural office environment like ESCWA's.

I would welcome the opportunity to bring this foundation, and my genuine enthusiasm for cybersecurity, to your team. Thank you for considering my application. I have attached my CV for your review and would be glad to provide any further information or discuss my candidacy at your convenience.

Sincerely,
Saad Najib
